Use of Force

Quarterly Report

3rd Quarter: July 1 – September 30, 2024

Albany Police Department

Report prepared by: Accreditation Manager Merab Smith and the APD Use of Force Instructors and Trainers

Introduction

This is the third quarterly report for Use of Force incidents for the Albany Police Department in 2024. Quarterly reports are designed to provide supervisors and training coordinators with information regarding use of force incidents. The Albany Police Department started compiling quarterly use of force data in January 2020. This report will compare the past three years' quarterly data. This information will be utilized to identify patterns or trends that could indicate training needs, equipment upgrades, and/or policy modifications. The third quarter data ranges from July 1 to September 30, 2024. There were 38 use of force incidents and 93 types of force used on 38 subjects. There are more total uses of force because many times an officer will use force that may be ineffective thus requiring more than one force technique during an incident or if multiple officers are present and called upon to use force, this accounts for each application of force to each subject during each incident.

Officers use de minimis force whenever possible. De minimis force is defined as a physical interaction meant to separate, guide, and/or control without the use of formal control techniques, or other techniques that are intended to, or reasonably likely to cause any pain or injury. The use of force requires notification and report when physical force, except de minimis force, is used.

Classification of Initiating Call

The following information outlines the types of calls that initiated the need for use of force by the Albany Police Department. Due to the large number of call types, we have condensed this information into 8 categories. During the annual use of force meeting in February 2024, the team decided it was appropriate to separate Assist Other Agency/Warrant to two categories: Assist Other Agency and Wanted Person/Warrant.

Other Factors

In 2021, we began tracking whether the use of force incident involved a mental health crisis and if the subject was under the influence of alcohol or drugs based on the perceptions of the officers involved. The "both" category includes subjects that were perceived as under the influence of intoxicants and experiencing a mental health crisis.

Resistance Encountered

We changed our reporting software to Guardian Tracking in May 2021. During this time our department use of force coordinators assessed our reporting categories and added active resistance and high-risk subjects. Guardian Tracking allows for each officer to report on the resistance they encountered during the use of force incident. Previously, resistance was only reported for the overall incident rather than what each officer encountered. This creates more reporting, which increased the number of resistance data being reported. During our quarterly use of force meeting in July 2022, it was determined that "charging" needed to be added as a category of resistance encountered as this was often reported in the "other" category.

Type of Force Used

During our quarterly use of force meeting in July 2022, it was decided to add "lateral recovery restraint" as a category of type of force used. The lateral recovery restraint allows officers to gain control of the subject without restricting their airway.
