Use of Force

Quarterly Report

3rd Quarter: July 1 – September 30, 2025

Albany Police Department

Report prepared by: Accreditation Manager Merab Smith and the APD Use of Force Instructors and Trainers

Introduction

This report marks the third quarterly review of Use of Force incidents for the Albany Police Department in 2025. Quarterly reports serve as a valuable resource for supervisors and training coordinators, providing insights into use of force incidents. The Albany Police Department began compiling quarterly use of force data in January 2020, allowing for a comparative analysis of the past three years. This report examines trends and patterns that may indicate training needs, equipment upgrades, or policy modifications.

The third quarter data covers the period from July 1 to September 30, 2025. During this time, there were 44 use of force incidents, involving 106 applications of force on 44 subjects. The total number of force applications exceeds the number of incidents, as officers may utilize multiple techniques when initial attempts prove ineffective. Additionally, when multiple officers are involved, each use of force is counted individually for each subject.

Whenever possible, officers employ de minimis force, which is defined as physical interaction used to separate, guide, or control without formal control techniques or actions likely to cause pain or injury. Use of force incidents require notification and reporting whenever physical force, excluding de minimis force, is applied.

Classification of Initiating Call

The following summary highlights the types of calls that led to use of force incidents by the Albany Police Department. Given the extensive range of call types, this data has been consolidated into eight categories.

During the annual Use of Force meeting in February 2024, the team determined that it would be beneficial to separate the *Assist Other Agency/Warrant* category into two distinct classifications: *Assist Other Agency* and *Wanted Person/Warrant*.

Classification of Initiating Call	Q3 2023		Q3 2024		Q3 2025	
Fight or Disturbance	19	43.2%	14	36.8%	6	13.6%
Assist Other Agency	1	2.3%	0	0.0%	4	9.1%
Wanted Person/Warrant	8	18.2%	4	10.5%	7	15.9%
Traffic	3	6.8%	3	7.9%	3	6.8%
Property Crime	4	9.1%	8	21.1%	4	9.1%
Mental Health or Suicidal	1	2.3%	1	2.6%	2	4.5%
Drug Related	1	2.3%	3	7.9%	0	0.0%
Other	7	15.9%	5	13.2%	18	40.9%

Other Factors

Starting in 2021, we began documenting whether use of force incidents involved a perceived mental health crisis and whether the subject was believed to be under the influence of alcohol or drugs, based on officers' observations. The "Both" category includes individuals who were perceived as experiencing both a mental health crisis and intoxication.

Other Factors	Q3 2023		Q3 2024		Q3 2025	
Intoxicated	18	37.5%	10	26.3%	7	15.9%
Mental Health Crisis	8	16.7%	7	18.4%	12	27.3%

Day of Week/Time of Day

Analyzing use of force data based on time of day and day of the week helps identify patterns in incident occurrences. This analysis can reveal peak periods when use of force is more frequent, such as during late-night hours or weekends, which may correspond to increased calls related to alcohol use, disturbances, or high-traffic enforcement.

Day of Incident	Q3 2023		Q3 2024		Q3 2025

Resistance Encountered

Analyzing use of force data related to the resistance officers encounter provides valuable insight into the dynamics of law enforcement interactions. This data can reveal patterns in resistance types, such as whether certain situations or call types more frequently involve physical resistance. Additionally, it allows departments to assess how officers apply force in response, ensuring that techniques align with best practices and training objectives.

Type of Force Used

This data helps determine whether force applications align with training and policy guidelines while also revealing opportunities for improvement in tactics, equipment, or de-escalation strategies. Additionally, training plays a significant role in shaping force application patterns. When officers receive focused training in specific techniques or tactics, the use of those trained methods often increases, while reliance on other forms of force may decrease. Tracking these trends over time allows us to evaluate the effectiveness of our training programs and make informed adjustments to enhance both officer safety and community interactions.

In July 2025, the classifications for K9 use of force were revised to more accurately reflect the type of force applied. The category K9 Display was removed, and a new category, K9 Surrender, was introduced. The updated definitions are as follows:

- **K9 Deploy** - When the K9 handler determines that requisite conditions exist permitting the use of the K9, the K9 handler deploys the K9, and, but for circumstances of the event, the suspect does not surrender because of the K9's presence and the suspect is not bitten.
- **K9 Surrender** - When a K9 is deployed, the suspect is arrested/detained/located, and there is articulable information that BECAUSE OF THE K9'S INVOLVEMENT the suspect surrendered to police custody.
- **K9 Bite** - When a K9 bites a suspect, intentionally or unintentionally.
