PRIMARY/ MEDICAL CARE

Our skilled team of experienced physicians, nurses and other medical personnel are equipped to deal with all standard preventive and routine medical care including annual physicals, sports physicals, pregnancy tests, blood tests, and so on.

Aspire patients also receive the benefit of having their medical care fully integrated with other comprehensive services as needed including behavioral health, substance use treatment, employment and housing assistance, and other social factors that impact a person's physical and mental wellbeing.

We are an accredited Federally Qualified Health Center (FQHC), meaning we meet the high standards required to accept Medicare and Medicaid, as well as most forms of private insurance. Aspire also offers a sliding-fee scale for the uninsured. We are nonprofit and will not refuse medical services based on the ability to pay.

Aspire Indiana Health is proud to offer fully integrated "whole health" services to Central Indiana including Primary Care. Like any family medicine practice, our six clinics offer high-quality, compassionate primary care for Hoosiers from every walk of life, from small children to senior citizens, as well as prenatal care.
