## Section 5: Narrative Interpretation of Data

Data presented in the research indicates a continued need to maintain current recruitment efforts focused on females. While there were no significant changes (less than 1%) to the composition of the EPSO workforce related to the ratio of male to female employees in Protective Services positions, efforts to recruit females for protective service sworn and non-sworn positions should continue. Emphasis should be placed on recruiting white females as this demographic experienced the most significant drop in both sworn (8 or 2%) and non-sworn (5 or 5%), Protective Services positions. All other demographic categories experienced changes of 2% or less.

Successful recruitment of females from all demographics will allow for the EPSO workforce to more closely reflect the diverse composition of the community within El Paso County.
