

Board Policy: 706 – AI Integration and Responsible Use Policy

Subject: Non-Instructional Operations & Business Services - Information Technologies (IT)
Series 706: AI Integration and Responsible Use Policy

Kirkwood Community College defines Artificial Intelligence (AI) as systems or machines that mimic human intelligence (e.g., learning, reasoning, problem-solving, and language understanding) to perform tasks. This policy encompasses all AI tools that generate content (e.g. text, code, images) or make predictions.

The College recognizes AI as a powerful and transformative tool capable of fostering innovation, enhancing institutional efficiency, and preparing students with the advanced competencies required by the modern workforce. Any use of AI by members of the college community must be responsible and ethical.
