

NCCCP Model

National EMS Certifications

- Total credits required in the National Continued Competency Program (NCCP) 2025 Model (National + Local + Individual) vary by level. EMR = 16, EMT = 40, AEMT = 50, Paramedic = 60
- 10% of your total National Component credits must be in pediatric content

National Component Requirement by Level		Airway	Cardiology	Trauma	Medical	Operations	Total National Component Credits
NREMR	Emergency Medical Responder	1.5	2	1	2.5	1	8
NREMT	Emergency Medical Technician	4	5	3	6	2	20
NRAEMT	Advanced Emergency Medical Technician	5	6	4	7	3	25
NRP	Paramedic	6	7	5	8	4	30

As part of The National Continued Competency Program (NCCP), the National Registry accepts different types of education including academic courses, initial EMS programs, continuing education credits, and refresher courses. In addition, you also may use the maximum credits the National Registry allows for any of the standardized courses listed below. All education must be approved by your state EMS office, or CAPCE-accredited and directly related to EMS patient care.

Standardized Course Guide

To recertify with the National Registry of Emergency Medical Technicians, you may take classes that are accepted by your state EMS office, or CAPCE-accredited and directly related to EMS patient care. While the National Registry recognizes that CAPCE or State Offices/Organizations may provide a number of credits, the National Registry sets a maximum number of credits as indicated below. Only that number will be allowed for recertification, re-entry, and state-licensed entry. Ex. If CAPCE allows 4 credits, and our maximum is 2 credits, then only 2 credits will be allowed.

Note: A ✓ indicates that the course can be assigned under that broad topic domain in the application.
