Crop/Livestock Supplier List

Overview

This form is part of your Organic System Plan (OSP) and documents the suppliers of all agricultural products used in your organic operation (*e.g.* live animals, feed, seedlings, bedding, products used in mushroom production). Maintaining an accurate supplier list supports verification that all sourced materials comply with USDA organic regulations.

How to Complete This Form

List each product on a separate row, including items used in organic production such as feed, seeds, seedlings, live animals, bedding, and any other purchased inputs.
Enter supplier and certifier information to accurately reflect the organic status of each product.
Maintain documentation supporting the organic status of all certified products, such as current organic certificates.
Update this list whenever suppliers, products, or certification status changes.
If you do not import any products, check the "I do not import" box at the top of the Imports column. If any products on this list are imported, leave that box unchecked and indicate which individual products are imported by checking the box on the applicable rows.

Field Instructions

Product Name -- Enter the name of the specific product provided by the supplier. List each product on its own row, even if multiple products come from the same supplier.

Supplier Name -- Enter the name of the business or individual supplying the product.

Certifier -- Enter the name of the certifying agent that issued the supplier's organic certificate. If the product is not certified organic, write "nonorganic" in this field.

Type of Product -- Indicate how the product is used in your operation (e.g., feed, seeds, seedlings, bedding, live animals). Use the examples in the column header as a guide.

Imports -- If you do not import any products on this list, check the "I do not import" box at the top of this column and leave all row-level checkboxes unchecked. If one or more products are imported, leave the top box unchecked and check the box on each row where the product is imported from outside the country.

Comments -- Use this field to record any additional information relevant to the product or supplier, including the country of origin for any imported products.

Example form below is for illustration only.

Crop/Livestock Supplier List

Instructions: List all suppliers of products used in organic production including but not limited to: live animals, feed, seedlings, bedding, products used in mushroom production, such as agricultural ingredients for substrate production, spawn, etc.
Please add materials and inputs, such as products used for fertility, pests, disease, cleaning, etc to your Materials List.

Product Name	Supplier Name	Certifier (indicate nonorganic if not a certified product)	Type of Product (Ex. Feed, seeds, seedlings, bedding, etc.)	Imports: I do not import (FALSE) / Check for imported products and list country in comment field	Use/Comments	PCO Use Only (MRT # for non-organic)
Corn	Agricultural Suppliers USA	QAI	Feed	FALSE		
Wheat	Super Suppliers	CCOF	Seed	FALSE		
Wheat Straw	Super Suppliers	CCOF	Bedding	FALSE		
Strawberries	Berry USA	QCS	Transplants	FALSE		
Pepper Seeds - High Bright	Native Peppers	not certified	Seed	TRUE	Imported from Canada	
Beef Cattle - Slaughter Eligible	Joe's Ranch	MOSA	Live Animal	FALSE
