The Chief and Deputy Chief provided an update on implementation of the new CAD/RMS system. The department is approximately five weeks into deployment. While staff are still working through system adjustments, daily operations remain stable. The legacy IMC software remains accessible for historical data and reporting needs. Department staff are fine-tuning workflows across divisions and continuing training. CrimeView Analytics is being implemented to enhance data analysis and trend tracking. The Deputy Chief noted that the system significantly impacts patrol officers' day-to-day operations due to changes in formatting and workflows. Officers are actively engaged in adapting, and a strong team-based approach is underway. The Chief emphasized strong buy-in from staff, with officers helping guide improvements. Chair Scherr acknowledged the cumulative impact of multiple technology changes occurring simultaneously (body cameras, CAD/RMS, phone system).
