Time Frames

For most required visits, the time frame and location for the visit type is prescribed. These can be found within the Quick Reference Table and under each type of visits within these guide. In some cases, the FSW or their supervisor may determine that more visitation is necessary to ensure the safety and well-being of the child/youth. If this determination occurs, the Team Leader (TL) should document this in case conference notes in the child/youth's electronic record.

Documentation

All contact related to cases should be documented in the electronic record. The form [CS-0594, Visitation Observation Checklist](#) should be used to document specific events and behavior related to the visit. This document is uploaded into TFACTS in the Document section. A case recording is entered into TFACTS to reflect a visit occurring but can reference form [CS-0594, Visitation Observation Checklist](#) for details regarding the visit. Any visit specific additional documentation is listed in the guide under the visitation type. Policy [16.38 Face-to-Face Visitation with Dependent/Neglected/Unruly Children in DCS Custody](#) and Policy [31.14 Documentation of TFACTS Case Recordings](#) outline timeframes related to entry of documentation.
