11.2.13 Limited Data Sets

Chapter 11 - Patient Privacy

Original Effective Date: April 2003

Section: 11.2 Uses and Disclosures of Protected Health Information

Date Last Reviewed: March 2013

Responsible Entity: Chief Compliance Officer for Regulatory Affairs & Compliance

Date Last Revised: March 2013

I. Purpose

In compliance with federal privacy regulations, the purpose of this policy is to establish the allowable use of limited data sets containing Patient Health Information.

II. Scope

This policy applies to all faculty, staff, students, residents, healthcare providers, researchers, contractors, or any other individual (collectively, Workforce Member, including employees and non-employees) who has direct or indirect access to patient protected health information (PHI) created, held or maintained by any UT Health San Antonio controlled affiliate, including, but not limited to its clinics, hospitals, and research operations.

III. Policy

UT Health San Antonio (UTHSA) may use a limited data set of patient health information and enter into a data use agreement with recipients of the limited data set to protect the confidentiality of the individual and to allow UTHSA to use or disclose such information for research, public health, or health care operations without the individual's authorization. Any disclosure or request for a limited data set must adhere to the minimum necessary requirements of the federal privacy regulations.

A. Elements of Limited Data Set:

UTHSA may, without an authorization or other permission from the individual, either:

1. Use protected health information to create a limited data set; or,

2. Disclose protected health information to a business associate for the sole purpose of creating a limited data set, independent of whether UTHSA intends to use the limited data set.

A limited data set could include the following identifiable information:
11.2.13 Limited Data Sets

1. Admission, discharge and service dates;
3. Date of death;
4. Date of birth;
5. Age (including age 90 or over); or,
6. Five-digit zip code or any other geographic subdivision such as state, county, city, precinct, and their equivalent geocode.

B. Creation of Limited Data Set:

To create a limited data set, the protected health information must exclude the following direct identifiers of the individual or of relatives, employers, or household members of the individual:

1. Names;
2. Street address or post office box;
3. Telephone numbers;
4. Fax numbers;
5. Electronic mail addresses;
6. Social Security numbers;
7. Medical record numbers;
8. Health plan beneficiary numbers;
9. Account numbers;
10. Certificate/license numbers;
11. Vehicle identifiers and serial numbers, including license plate numbers;
12. Device identifiers and serial numbers;
13. Web Universal Resource Locators (URLs);
14. Internet Protocol (IP) address numbers;
15. Biometric identifiers, including finger and voice prints;
16. Full face photographic images and any comparable images; and,
17. Any other unique identifying number, characteristic, or code.

C. Data Use Agreement

UTHSA may use or disclose a limited data set only if the UTHSA obtains satisfactory assurance, in the form of a data use agreement, that the limited data set recipient will only use or disclose the protected health information for limited purposes. The data use agreement must:
11.2.13 Limited Data Sets

1. Establish the permitted uses and disclosures of the information, which permitted uses and disclosures may include only research, public health, health care operations, or as otherwise required by law, and may not authorize the limited data set recipient to use or further disclose the information in a manner that would violate the federal privacy regulations if performed by UTHSA;

2. Establish who is permitted to use or receive the limited data set; and,

3. Provide that the limited data set recipient will:
   a. Not use or further disclose the information other than as permitted by the data use agreement or as otherwise required by law;
   b. Use appropriate safeguards to prevent use or disclosure of the information other than as provided for by the data use agreement;
   c. Report to the Health Science Center any use or disclosure of the information not provided for by its data agreement of which it becomes aware;
   d. Request the minimum amount of information necessary to fulfill the requirement of the request;
   e. Ensure that any agents, including a subcontractor, to whom it provides the limited data set agrees to the same restrictions and conditions that apply to the limited data set recipient with respect to such information; and,
   f. Not identify the information or contact the individuals.

If a UTHSA employee is requesting the use of a limited data set for research, public health, or health care operations, and he/she has signed a UTHSA Confidentiality/Security Acknowledgement, a Data Use Agreement is not required.

If another entity requests a limited data set from UTHSA, the entity will be asked to use the UTHSA Data Use Agreement, unless the UTHSA Office of Legal Affairs approves the use of the outside entity’s agreement. If UTHSA requests the use of a limited data set from another covered entity, the UTHSA will request and use the other entity’s agreement, unless the entity is willing to use the UTHSA agreement.

D. Business Associates and Data Use Agreements

If UTHSA hires an entity to prepare a limited data set on UTHSA's behalf, UTHSA will need a business associate agreement with this entity. If the business associate is also going to use the limited data set for some purpose, other than just creating it, UTHSA will also need a data use agreement, in addition to the business associate agreement. These two agreements may be combined into one agreement. If UTHSA is disclosing an already made limited data set, the recipient must have a Data Use Agreement, but not a business associate agreement. All business associate agreements and data use agreements must be routed to the Office of Legal Affairs to ensure that they are appropriate and worded correctly.
E. Compliance

If UTHSA knows of a pattern of activity or practice of a limited data set recipient that constitutes a material breach or violation of the data use agreement, UTHSA must take reasonable steps to cure the breach or end the violation, as applicable, and, if such steps are unsuccessful:

1. Discontinue disclosure of protected health information to the recipient; and,
2. Report the problem to UTHSA's Privacy Officer in the Office of Regulatory Affairs and Compliance.

If UTHSA is a recipient of a limited data set, UTHSA must comply with the requirements applicable to limited data set recipients set forth in this policy.

IV. Definitions

There are no defined terms used in this Policy.

V. Related References

There are no related documents associated with this Policy.

VI. Review and Approval History

A. The approving authority of this policy is the University Executive Committee.

B. The review frequency cycle is set for three years following the last review date, a time period that is not mandated by regulatory, accreditation, or other authority.
