A review of the unemployment compensation benefit (UNCB) screen will assist in determining whether the NCP is receiving benefits within states reporting this information.

LASES is programmed to automatically generate an income assignment to Louisiana's Department of Labor. The analyst should not populate EMDA with unemployment compensation information for NCPs receiving benefits from the state of Louisiana.

Information regarding states that are not listed in this section as well as contact information may be located by reviewing the [Intergovernmental Referral Guide \(IRG\)](#). Log on as a state user in order to allow access to all the information available.
