Louisiana Department of Public Safety
Office of Motor Vehicles
Policy 28.00 Glider Kits

Section: 4. Motor Vehicle Registration Requirements

Effective Date: 04/11/1988

Revised Date: 06/06/2018

Authority:
Administrative

General:
- A glider kit is manufactured with its own frame and uses only the power train (motor, transmission, drive shaft, and rear axles) from previously existing vehicles.
- Due to the VIN edit check, the initial file must be submitted to the Specialized Vehicle Unit, Headquarters, and must contain the required items shown in each situation listed below.

Requirements:
- **Title and assignment of glider kit in the same owner's name**
  - A completed vehicle application form (DPSMV 1799) showing driver's license number or EIN and odometer reading of the dismantled vehicle
  - Manufacturer's statement of origin for glider kit, properly assigned and notarized
  - Notarized bill of sale for the glider kit
  - Title to the dismantled vehicle
  - Title, license, taxes computed on glider kit
  - DPSSP 3515, Affidavit of Physical Inspection executed by an officer with the LA State Police Towing & Recovery Unit verifying that the serial number on the new body or kit agrees with the statement of origin and also verifying the serial number and the make of the component parts of the power train (engine, transmission, drive shaft, and rear axles) installed in the glider kit.
- **Title not in same owner's name**
  - All requirements listed above
  - Properly assigned and notarized title
  - A completed vehicle application form (DPSMV 1799) for vehicle to be installed under kit
  - Notarized invoice or bill of sale
  - Applicable taxes and fees
