

Louisiana Department of Public Safety
Office of Motor Vehicles
Policy 84.00 Kit Cars

Section: 4. Motor Vehicle Registration Requirements

Effective Date: 04/11/1988

Revised Date: 10/23/1989

General:

- A kit car is a vehicle that is assembled utilizing a kit combined with the chassis and/or power train of pre-existing vehicle or vehicles.
- The **initial** transaction on these vehicles must be routed to the *Dealer Support Unit, Headquarters, to process and set a "KC" flag on the computer.
- These vehicles normally would not pass the VIN edit check on our computer system. However, once the initial transaction is processed at Headquarters and the "KC" flag is set, it should bypass the VIN edit check.
- After the initial transaction is processed, subsequent transactions may be processed in the Field or HQ offices.
- The words "kit car" will be printed on the title and will remain on all subsequent records.
