April 2023

Dear Medical Provider,

Your patient has enrolled as a student at San Diego State University. As part of their enrollment at our institution, this student is required to obtain the following vaccinations:

Required Immunizations & Screenings	**Required Dosage & Screening Information**
Measles, Mumps and Rubella (MMR)	Two (2) doses with first dose on or after 1st birthday; OR positive titer (laboratory evidence of immunity to disease)
Varicella (Chickenpox)	Two (2) doses with first dose on or after 1st birthday; OR positive titer. History of contracting the disease does not meet compliance
Tetanus, Diphtheria and Pertussis (Tdap)	One (1) dose within the last 10 years.
Meningococcal conjugate (Serogroups A, C, Y, & W-135)	At least one dose at age 16 or beyond for students through age 21.
Meningococcal B (Meningitis B)	Complete series, may be two or three doses, for students age 16 through 21.
Hepatitis B	Students age 18 and younger should complete series. Based on type of vaccine the series is either 2 or 3 doses (CA Health & Safety Code, Sec. 120390.5).
COVID-19	Completion of a primary COVID-19 vaccine series plus a booster, if eligible for one.

In addition, students will be required to complete a Tuberculosis (TB) risk assessment that is available to them in their online patient portal. For most students, this will not require any medical provider evaluation.

Please note, your patient is required to comply with these requirements exactly as they are specified.

We recognize that in some cases the requirements exceed what an average adult would require on The Centers for Disease Control and Prevention (CDC) Adult Vaccine Schedule. The CDC has identified colleges and universities as higher risk environments because of the large number of individuals who live, study, and work in close proximity to each other. For this reason, students who do not have one of the vaccines listed above must be vaccinated with the number of doses specified.

We appreciate your assistance with administering these vaccines to your patient and/or providing orders for them to be able to obtain them elsewhere.
